

PINNACLE FOLDING RAIL

FOR SL300 AND SL600

WORRY FREE

Harmar's patented folding rail is an innovative option that was designed to eliminate obstructions at the bottom of the stairs. Folds upright when the stair lift is located towards top.

The automatic, mechanical design helps ensure dependable, trouble-free operation.

- Automatic deployment while stairlift remains in motion - no extra buttons to press.
- Charging strips above and below the hinges provide flexibility.
- Adjustable rubber feet to protect flooring.

I really like this Pinnacle Folding Rail design. It's so simple as it deploys and retracts automatically when I ride my lift. I don't have to worry about blocking the walkway at the bottom of my stairs.

SL300FR PRODUCT SPECIFICATIONS

WEIGHT CAPACITY	300 lb
TRACK LENGTH	15' 6"
FOLDED WIDTH	13 ½"
FEATURE(S)	<ul style="list-style-type: none"> - Automatic deployment - Continuous motion - Charging strips above and below hinge for flexibility
WARRANTY	<ul style="list-style-type: none"> - 10-year gear rack - 2-year parts - 1-year battery

SL600FR PRODUCT SPECIFICATIONS

WEIGHT CAPACITY	350 lb
TRACK LENGTH	15' 6"
FOLDED WIDTH	13 ½"
FEATURE(S)	<ul style="list-style-type: none"> - Automatic deployment - Continuous motion - Charging strips above and below hinge for flexibility
WARRANTY	Limited lifetime
