ACCESS

The HomeGlide Outdoor stairlift is an ideal solution for straight outdoor staircases around your home.

02

The HomeGlide straight stairlift range is designed for effortless simplicity with superior comfort and confidence, both indoors and outdoors.

The HomeGlide Outdoor model, with its specially treated components, delivers an ideal solution, specifically for your outdoor straight staircase requirements. This means that you can enjoy outdoor access all year round with peace of mind.

With its modern, ergonomic seat design and slim aluminium rail, the HomeGlide Outdoor makes a discreet addition to your home surroundings, while ensuring safe and comfortable access outside.

In addition, the HomeGlide Outdoor is fitted onto your steps and not the wall, which allows your new lift to be installed quickly, efficiently and with minimal disruption.

03

1

## Designed For You

The HomeGlide Outdoor is designed with you in mind; its features are selected for your comfort and confidence.

Operated with an easy-to-use joystick, minimal effort is needed to use the HomeGlide Outdoor. The ergonomic moulded chair with swivel provides a safe, comfortable sitting position and firm support during travel and landing.

The lift's weather-protected engineering and design features mean that you can enjoy your garden throughout the year.

The single-moulded Outdoor seat with smooth, all-weather surface also dries quickly and is easy to wipe and keep clean.

04

3

## Compact & Discreet

The HomeGlide Outdoor has a modern design and is effortlessly simple and robust. Its slim aluminium rail and neutral, rounded chair allow the lift to blend discreetly with your outdoor space.

Indoor remote control handsets send the HomeGlide to park at either the top or bottom of your outdoor steps, wherever is the most convenient for you.

When not in use, your HomeGlide Outdoor can be folded away to only 385mm on any landing, out of the way of other staircase users.

2

## Safety & Confidence

Your safety is of paramount importance to us. The HomeGlide Outdoor is certified to Machine Directive 2006/42/EC, EN 81-40:2020 and UKCA standards. Armrest and seatbelt safety detectors keep you secure while on the stairlift.

During travel, if the lift encounters an obstacle, it will come safely to a stop due to special safety edges on the drive unit and footrest. In addition, the Outdoor stairlift is battery-operated, which means you can still use it during a power cut.

For your peace of mind and convenience, the HomeGlide Outdoor model includes a safety keylock pre-fitted as standard, and offers you the option of a call device (programmable for three numbers), to ensure you can stay connected with family and friends, when using the lift.

Engineered with modern manufacturing techniques and technology, the HomeGlide Outdoor stairlift provides a valuable addition to your home environment. HomeGlide Outdoor is certified to meet your outdoor mobility requirements and can be fitted to straight staircases from as narrow as 740mm, with a maximum weight capacity of 160kg.

05

By choosing the HomeGlide Outdoor, you can have the freedom and confidence to enjoy outdoor access, whatever the season.

### Remote controls (indoor)

06 Remote control handsets are always included to enable you to call and park your lift without effort. With an intuitive modern design and a neutral colour palette, they sit discreetly on the wall inside your home without intrusion.

### Manual swivel

For your comfort and safety, the HomeGlide Outdoor model comprises a manual swivel function. Using the manual swivel lever at the top landing turns the chair 70° away from the top step to enable a safe exit from the chair.

### Joystick

Designed with a comfortable soft-touch grip, the HomeGlide Outdoor integrated joystick is user-friendly and requires minimal effort to take you up and down your steps with ease.

### Seatbelt

The retractable seatbelt keeps you secure while using your stairlift. An integrated safety sensor ensures that the seatbelt is fastened securely before travel, and the stainless steel buckle is designed to be operated with just one hand.

07

### Year-round functionality

The HomeGlide Outdoor lift is certified for use throughout the seasons, with a weatherproof coating on all exposed parts to protect against rain, dust and direct sunlight. The durable external motor cover protects the motor and on-off switch from the elements.

### Protective cover

We automatically include a full-length cover with the HomeGlide Outdoor, suitable for outdoor use. The fitted cover protects the lift from dust and garden debris and provides additional protection against the weather for both the chair and motor when not in use.

### Keylock

The HomeGlide Outdoor comes pre-fitted with a dedicated keylock for your peace of mind. This enables you to isolate the lift to specific people and is particularly useful when children or grandchildren visit or if the lift is used in a public setting.

### Call device

Our optional integrated call device ensures you stay connected with friends and family, with up to three different telephone numbers stored and contactable directly from your stairlift.
